Как сделать аккуратную книжку: пошаговая инструкция

Шаг 1. Печать

- ⇒ Настройте документ для печати на **листе A4** в **альбомной** ориентации.
- ⇒ Убедитесь, что принтер работает в режиме **цветной печати** и в нём достаточно чернил.
- ⇒ Печатайте на **одной стороне** листа.
- ⇒ Для страниц **22 и 23**:
 - распечатайте их на двусторонней печати — так получится задняя обложка;
 - или распечатайте отдельно каждую сторону и потом склейте.
- ⇒ Сначала сделайте тестовую печать нескольких страниц — проверьте, всё ли выглядит как надо.
- ⇒ После проверки распечатайте всю книжку.

Шаг 2. Сборка

- ⇒ Проверьте, чтобы страницы шли в правильном порядке.
- ⇒ Сложите листы и выровняйте их в ровную стопку.

Шаг 3. Скрепление разъёмными кольцами

- ⇒ Отметьте места для отверстий (обычно хватает 2–3 отверстий).
- ⇒ Прodelайте отверстия с помощью дырокола.
- ⇒ Соедините листы с помощью разъёмных колец.
- ⇒ Страницы **24 и 25 не скрепляйте** кольцами.

Шаг 4. Подготовка карточек

- ⇒ Вырежьте карточки со страниц **24 и 25**.
- ⇒ Поместите каждую вырезанную карточку в ламинирующую плёнку и заламинируйте.
- ⇒ Разрежьте их, чтобы получить отдельные карточки.

Полезные советы

- ⇒ Чтобы книжка была прочнее, можно заламинировать все листы.
- ⇒ Для более аккуратного и профессионального вида используйте специальные инструменты для брошюровки.
